Subject: Re:... La Plata ...have our well tested ... Form submission from: Emergency Response to Gold King Mine Release Contact Us About Emergency Response to the Gold King Mine Release form

Hello,

The US EPA has prepared the following information resource:

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.
EPA Hotline: 844-607-9700 (toll-free)

Comments: We were not notified until Sunday, August 9th via message on home phone machine that our house was in a capture area that could have our well tested and to call the local La Plata county number. We called Sunday, and 1/2 day Monday without any answer at the call center. Then all they did was take our name & number for well testing. Our neighbors stated that they were told NOT to drink their well water, and that stock water and drinking water would be available. We were never told this! or warned! Unfortunately, too late as the whole family and livestock have consumed the well water. Tuesday no call back on our well... So, we called on Wednesday again asking about our well being tested and asking for our stock water to be filled. Still on a waiting list I guess ?? Response and communication has been very poor. Should we contact New Mexico to have our well tested as the NM news advertises well testing being offered?
